STANDARDS BULLETIN 2014-32

Second Edition of CAN/ULC-S302-14

STANDARD FOR THE INSTALLATION, INSPECTION AND TESTING OF INTRUSION ALARM SYSTEMS

ULC Standards is pleased to announce the publication of the Second Edition of CAN/ULC-S302-14, Standard for the Installation, Inspection and Testing of Intrusion Alarm Systems. This Standard has been approved by the ULC Standards Committee on Security and Burglar Alarm Equipment and Systems and has been published under the date of September 2014.

This Standard prescribes requirements for the classification of extent of protection, and the installation, testing and inspection of intrusion alarm systems.

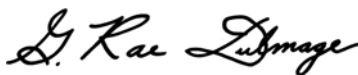

This edition of CAN/ULC-S302-14 reflects the merging of CAN/ULC-S310-M91 (R1999), Standard for Installation and Classification of Residential Burglar Alarm Systems into CAN/ULC-S302-M91 (R1999), Standard for the Installation and Classification of Burglar Alarm Systems for Financial and Commercial Premises, Safes and Vaults. CAN/ULC-S310-M91 (R1999) has now been superseded by CAN/ULC-S302-14. The other significant changes include the abandonment of occupancy related terminology, the application of Security Levels as the overall scale and the adoption of language more harmonized with that used in international standards.

If you require any additional information, please contact Megan Sepper at 847-664-3411 or by email at Megan.M.Sepper@ul.com.

This Standard can be ordered for \$360.00 CAN (Hardcopy) or \$300.00 CAN (PDF) from the ULC Standards website at www.ulc.ca and select *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials* for further details.

Yours truly,

ULC Standards
